

How to open Recovery mode on MAG-260?

It is necessary to do next:

- Turn off STB MAG-260.
- Press and hold «**reset**» button on back side of STB.

- Hold «**reset**» button and turn on STB MAG-260.
- After the LED start blinks - release «**reset**» button.
- Wait till next image appear on display:

- Press «**Menu**» button on remote control. [In case if you have new remote control](#)

Reset to factory settings

Warning! All user data will be lost!

- In recovery mode select **“wipe data/factory reset”**
- Select and confirm **“Yes - delete all user data”**. Wait for execution.
- Select **“reboot system now”**
