

How to program a programmable remote control MAG-200/250?

- Direct TV remote on programmable remote control MAG-200/250 ;
- Press and hold the TV SET on the programmable remote control until the red LED is illuminated with bright light;
- press and release one of the dedicated buttons programmable remote control, which will define the required function (red LED flashes);
- Press and release the button corresponding to the function on the TV remote (red LED will flash a few times faster and will once again be lit);
- After programming all the buttons again to press TV SET, to shut down the red LED.
